

Day-2 - Physical Connects

What is Network?

Two or More device (computer, mobile, server, printer etc) interconnected with each other for sharing information and communication.

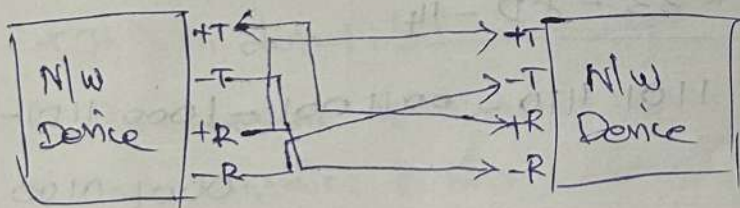

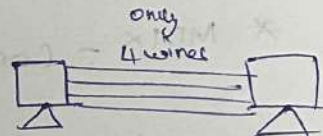

medium (cables)

- Radio frequency → Wireless
- Electrical Signal → Copper cable, Lan cable
- Light Signal → Fiber optic cable

UTP - Unshielded Twisted Pair → It contain 8 Copper wire (LAN)

Network Device -

- +T } Sending
- T }
- +R } Receiving
- R }

Crimping method:-

* Straight cable - Different function (switch)

* Cross cable - Same function Device
(PC, Router, Firewall)

Device	+T -T	+R -R
PC	1 2	3 6
Router	1 2	3 6
Switch	3 6	1 2

T-568A

T-568B

NIC - Network Interface Card

- it contains mac + IP

Function of NIC

It use to convert binary signals to electrical signal to binary

Type of NIC

wired - Copper, Fiber

wireless -

NIC technology

* Auto MDIX - it used any cables to connect Networks.

* MDIX - Connects only selected Cables.
